Monte has several very nice daughters in the herd. They are hard working does, that have proven to be excellent milkers with several of them going over 300# in their first lactation and having strong second lactations as well. We are very pleased with what he is doing in the herd and will be used heavily this year.

Velocity has a very exciting pedigree coming from the famous Temerity and when offered to us as a yearling, we jumped at the chance to own him! We love the general style and general appearance on his first kids. We cant wait to see his daughters fresh.

Mr. Rock as we call him is a very lovely looking buck as now a yearling. Although we do not have a ton of kids form him, the ones we do have we like very much. We admired Rock's dam at the 2010 National Show, and we are pleased to bring in some outside genetics as most of our stock is directly related to Kastdemur or Wingwood genetics.
